Table Rock Mainline Road Stabilization

August 3, 2007

Dear Interested Public:

The Bureau of Land Management (BLM), Cascades Resource Area would like your comments on a proposed project for road stabilization on the Table Rock Mainline for constructing a retaining structure which will withstand a 100-year flood event. The purpose of the project is to restore the road to a safe and usable standard primarily for timber haul and recreation use for campsites and the trailhead to Table Rock Wilderness. The Table Rock Mainline is used mostly by private timber companies and is maintained by BLM. There is a potential for 13,000 cubic yards of material to be distributed down stream if no repair is done. The site is located 2.4 miles on the Table Rock Mainline, which is located approximately 14 miles southeast of Molalla, Oregon.

An environmental assessment (EA) is being prepared for the proposed project. We hope to implement the project in the summer of 2008 between July 15 and August 31, the in-water work period recommended by the Oregon Department of Fish and Wildlife. We would appreciate your questions, comments, or concerns about the proposed action. Please send written comments to Cindy Enstrom, Field Manager Cascades Resource Area, at the address listed above, by August 17, 2007. If you would prefer to e-mail your comments, please send them to salem_mail@blm.gov, Attn: Cindy Enstrom.

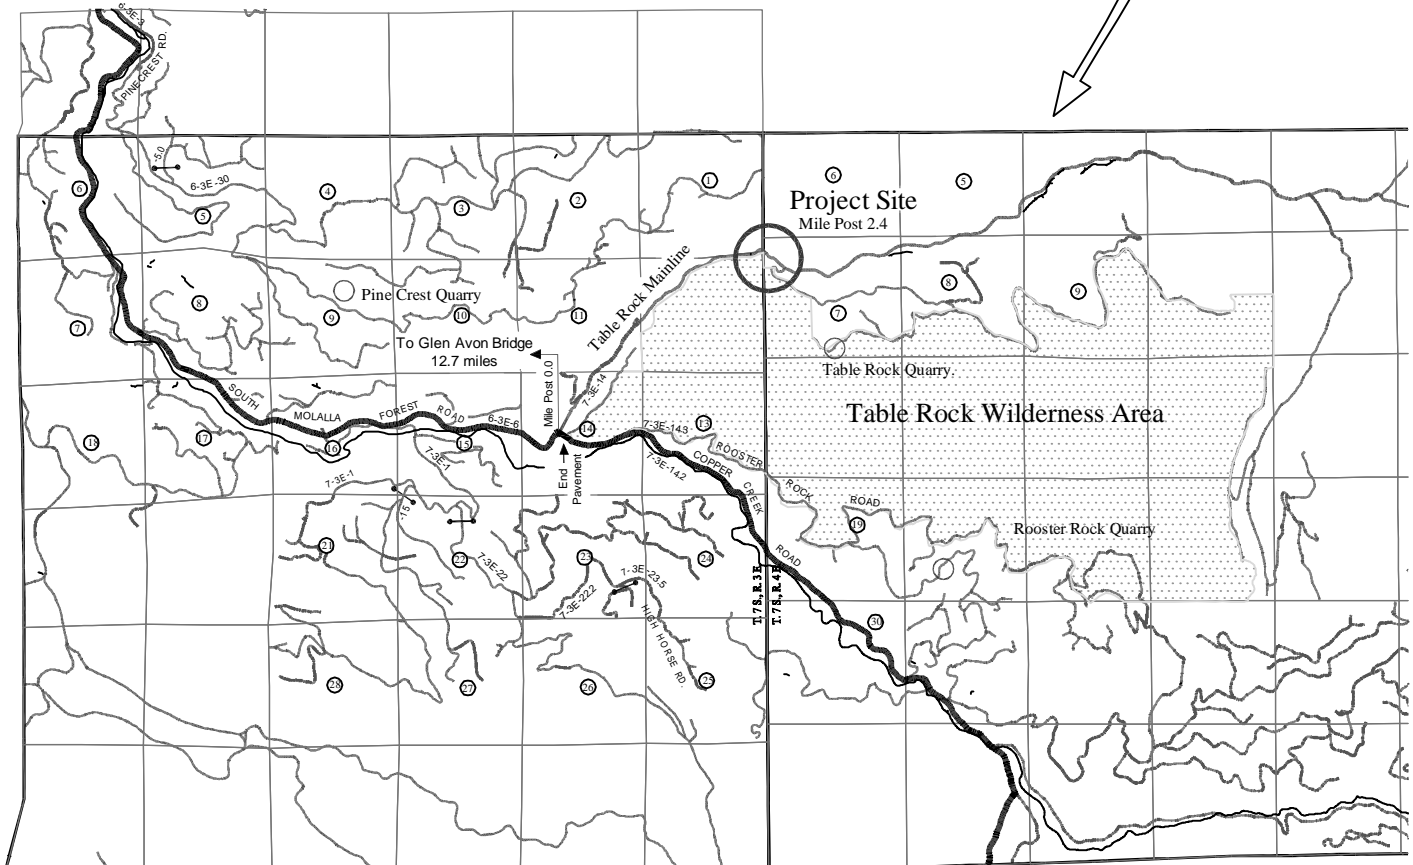

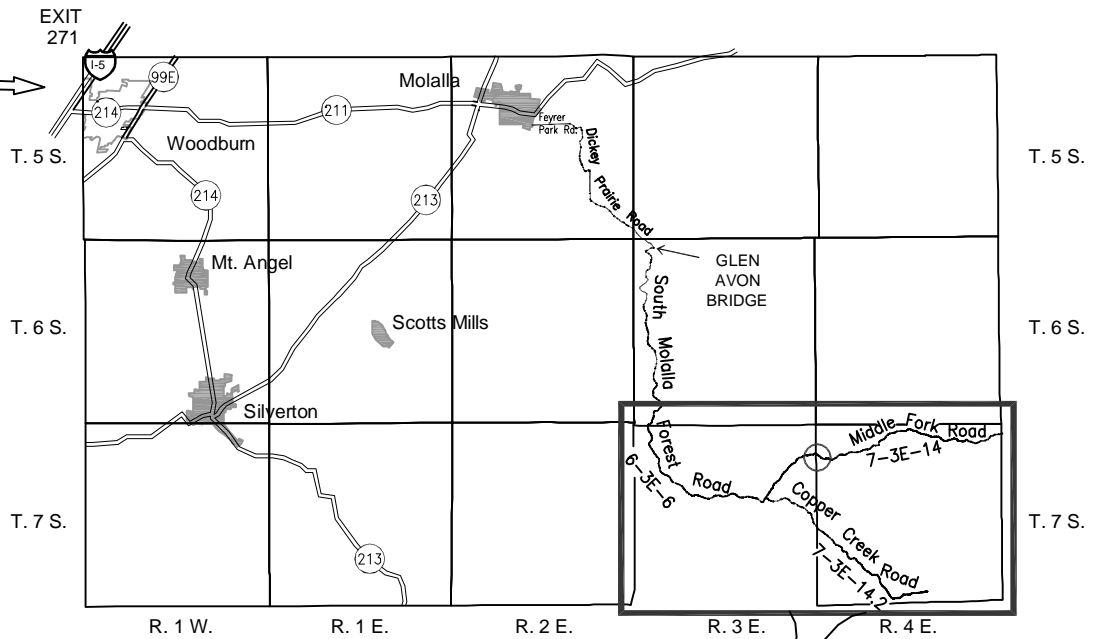

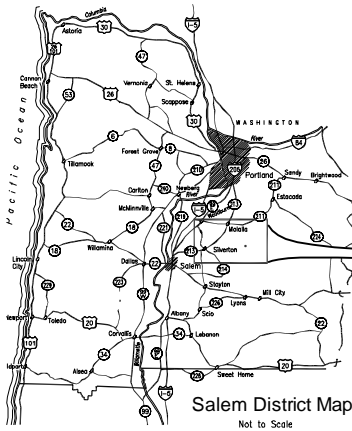

Thank you for your interest and participation. If you would like more information, please contact Amy Herburger at 503-315-5917. Alternatively, you may send an e-mail to salem_mail@blm.gov, Attn: Amy Herburger.

Sincerely,

Cindy Enstrom
Field Manager, Cascades Resource Area
